Irregular Bluestone

Product Information

Description

Irregular Bluestone is a natural stone quarried in Northern Pennsylvania and Southern New York. This stone has a natural cleft surface and a full range of color. The color range includes variations of blues, browns, greens, lilacs, rust, and gunmetal. Irregular Bluestone is great for use on patios, walkways, and pool decks.

Thickness (not gauged)

1” thick stone should be set in cement.

1.5” thick stone can be set in cement, sand or stone dust.

Approximate Coverage (depending on the size of the joint)

1” yields approximately 110 square feet per ton.

1.5” yields approximately 75 square feet per ton.

Selling Unit

Irregular Flagstone is sold by weight. There is approximately 1.5 to 2 tons per pallet.

Availability

Full Color range is a stocked item. Blue and Lilac can be special ordered in full pallet quantity's.
